Market Review

In the first quarter of 2025, equity markets finished lower after ending 2024 near all-time highs across most broad indices. As we highlighted in our Q4 letter, the market was closely watching how campaign promises and post-election rhetoric around various priorities could impact the trajectory of the US economy over the next four years. Shortly after President Trump's inauguration on Jan 20th, the new administration unleashed a flurry of new initiatives that quickly created uncertainty for the global economy, causing market volatility and weak equity performance in late February and throughout March. Key areas of focus include DOGE spending cuts, immigration policy, geopolitical strategy, and tariff implementation. It was our assumption that moving past the election outcome last November would allow the market to refocus on the path of the economy and the direction of earnings estimates. However, uncertainty around the near-term economic impact of these initiatives has rapidly shifted investor sentiment. Now there is a belief that growth is slowing, recession probabilities have risen, and inflation could become problematic once again. NCG has similar concerns, and we are closely monitoring each development and the potential impact on our portfolio holdings. That being said, our experienced team has been investing in growth companies for over 26 years, and we have invested through many challenging periods over that time. While near-term performance can be impacted in these environments, we believe in the long-term growth of the US and global economy, and we believe the clouds will eventually part. Our philosophy, process and team remain consistent, and we continue to invest in what we believe are the fastest growing and highest quality companies in America.

Portfolio Review

Our investment philosophy emphasizes direct research and adhering to a strong sell discipline. We strive to own companies that we believe can grow revenue and profits at strong rates in any economic and market environment. We feel we have the opportunity, if we pick the right stocks, to perform better than the index in all market environments. That did not happen in 1Q25, as we underperformed in all strategies (net of fees), except the micro cap. When the market is concerned about the near-term growth outlook for the economy that is not a great environment for our style. In periods like this, we remain focused on the fundamental growth drivers of each holding and maintaining portfolios consisting of what we believe are healthy growth companies, while eliminating holdings with deteriorating fundamentals.

For the quarter, our small and SMID cap strategies underperformed, mainly due to our holdings in the technology and industrials sectors. In micro cap, we outperformed due to performance from our holdings in the health care and technology sectors. Our large cap strategy underperformed during the quarter as well, due primarily to the technology sector.

Please see our product review write-ups for more information on performance drivers and portfolio activity in the quarter.

Market Outlook

Every market drawdown has its own unique set of opportunities and challenges at both the micro and macro level. Our experienced and stable team has worked through many of these environments over multiple decades, and we believe we can lean on our experience of bottom-up stock picking to navigate this market as well. There are still many unknowns and seemingly every day we are presented with new information which could impact the path of the economy and the direction of earnings estimates. As of now, investors are expecting strong earnings growth in 2025 for small, mid and large cap companies. *See Exhibit 1.* If this growth materializes, it would be a significant step-up year over year in small and mid cap and a continuation of strong growth in large cap. These projections are now being heavily scrutinized, and we will gain more visibility as companies report Q1 earnings over the coming weeks and provide insight into the remainder of 2025.

At all times it is important for us to incorporate both risks and potential opportunities into our thinking and portfolio construction positioning. While 'uncertainty' is the word of the day and the risk of a deeper economic slowdown has likely increased, we see some significant positives in the current environment. First, the new US administration has not solidified its go-forward international trade and tariff policies. While the market seems to be assuming the worst, the administration has recently been reflecting more flexibility in its approach, and we believe the final policy may not be as draconian as feared. Second, the Federal Reserve has paused its interest rate easing cycle for the past 4 months, but we believe, if the economy indeed begins to slow, it will strive to cushion any weakness with additional cuts this year. Third, we believe there are pro-growth policies being put in place. For example, strong forces driving increased infrastructure spending in the US have been gaining momentum for the past couple years and, we believe, remain intact. We feel the new administration is working to accelerate this trend and we are finding small companies which are direct beneficiaries. Finally, we believe many stocks are baking in a very negative future. On an absolute basis, we believe the future growth of the companies in our portfolios is not reflected in today's stock valuations. Large cap growth stocks have seen a significant pullback from the peak and small cap growth stocks are bumping along relative valuation levels not seen for many years. *See Exhibit 2.*

As always, we will stay focused on our core investment philosophy. We believe a portfolio of high-quality growth companies, selected using our original research, and combined with a strong sell discipline will lead to compounding of portfolio value and market outperformance over time. We believe our since inception investment results continue to support this approach.

Exhibit 1. 2024 and 2025 Earnings Growth Estimates (as of 3/31/2025)

Quarter/Year	Earnings Growth (%)								
	Small	Mid	Large	Small Caps		Mid Caps		Large Caps

1Q Portfolio Activity

- In technology, we are slightly underweight, but we maintain significant exposure to the sector as growth fundamentals remain strong in many of the large index positions as well as in many other areas. We are underweight the Mag 7 and have added additional holdings in the sector (see below).
- In consumer, we are underweight and continue to focus on companies we believe have long-term secular growth opportunities.
- The portfolio is underweight the health care sector. We are relying on our direct research to invest in companies with strong growth prospects trading at attractive valuations.
- Overweight in industrials driven by companies with what we believe have secular growth drivers.
- The portfolio is overweight the financial sector.
- We added 6 new positions in Q1:
 - five in technology: Snowflake, Inc., Salesforce, Inc., Marvell Technology, Inc., Broadcom, Inc., Atlassian Corp.
 - one in consumer: Spotify Technology, Carvana Co.
- We sold 5 positions to zero in Q1:
 - three in technology: Palo Alto Networks, Inc., Advanced Micro Devices, Inc., Toast, Inc.
 - one each in industrials (Symbotic, Inc.) and real estate (CoStar Group, Inc.)

The Russell Microcap® Growth Index measures the performance of the microcap growth segment of the U.S. equity market. It includes Russell Microcap companies that are considered more growth oriented relative to the overall market as defined by Russell's leading style methodology. The Russell Microcap Growth Index is constructed to provide a comprehensive and unbiased barometer for the microcap growth segment of the market. The Index is completely reconstituted annually to ensure larger stocks do not distort performance and characteristics of the microcap opportunity set. The Russell Microcap Growth Index is not an actual investment and does not reflect the deduction of transaction charges and other expenses that your account must bear. Additional information regarding policies for calculating and reporting returns is available upon request.

The NCG Micro Cap Growth Equity Composite contains portfolios investing primarily in the equity securities of smaller U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell Microcap® Growth Index.

The Next Century Growth Investors Small/Micro Cap Growth Equity Composite contains portfolios investing primarily in the equity securities of smaller companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. The strategy invests in both small and microcap companies. Investment results are measured versus the Russell 2000® Growth Index.

The NCG Small Capitalization Growth Equity Composite contains portfolios investing primarily in the equity securities of smaller U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell 2000® Growth Index.

The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the US equity universe. It includes those Russell 2000® companies with higher price-to-value ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect growth characteristics. The Russell 2000® Growth Index is not an actual investment and does not reflect the deduction of transaction charges and other expenses that your account must bear.

The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the US equity universe. It includes those Russell 1000® companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 1000® Growth Index is not an actual investment and does not reflect the deduction of transaction charges and other expenses that your account must bear.

The NCG Focused Large Capitalization Growth Composite contains portfolios investing primarily in equity securities of U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. The strategy invests in both large and medium companies with an emphasis on large capitalization. Investment results are measured versus the Russell 1000® Growth Index.

The Russell 2500™ Growth Index measures the performance of the small to mid-cap growth segment of the US equity universe. It includes those Russell 2500™ companies with higher growth earning potential as defined by FTSE Russell's leading style methodology. The Russell 2500™ Growth Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics.

The NCG Small/Mid Capitalization Equity Composite contains portfolios investing primarily in the equity securities of small and medium-sized U.S. companies that the portfolio manager believes have substantial potential for high long-term growth. The portfolio manager seeks to identify the fastest growing and highest quality companies for investment. Investment results are measured versus the Russell 2500™ Growth Index.
