Past performance does not guarantee future results. Fund performance is calculated based on the unadjusted net asset value per unit of the Fund. Returns include the reinvestment of all distributions, and current returns may be higher or lower than the performance shown. Gross returns are presented before management, performance, custodial, and other fees but after all trading expenses. Net returns are calculated after the deduction of management fees. A dilution adjustment may be applied to the subscription or redemption price per unit of a Fund to reflect trading costs, including any market spread.

The above unaudited amounts represent your allocable share of economic income and do not reflect adjustments required under the Internal Revenue Code to calculate taxable income.

We urge you to take a moment to compare the account balances contained in this report to the balances reflected on the statements you receive directly from your custodian. In the event of a discrepancy, the custodial statements are considered the official record of your account. Please contact your custodian with any questions you may have.
